

Kidofy

A key to better parenthood.

what does our app do?

It is a mobile application that uses Augmented Reality to guide the parents who have just entered their parenthood about the tips and tricks for the proper care of a newborn.

How important is proper massage for a new born ?

Promotes alertness and enhances learning.

Strengthens bones and facilitates weight gain

Enhances the bond between the parents and the baby

Existing Solution

Existing Solution

How it works?

Step 1:

Open our app and place
your phones camera above
your baby.

Step 2:

Simply choose the part you want to massage
by clicking the button on your phones scree.

How it works?

Step 3:

Place your camera focused
on that body part of your
baby and watch carefully.

Step 4:

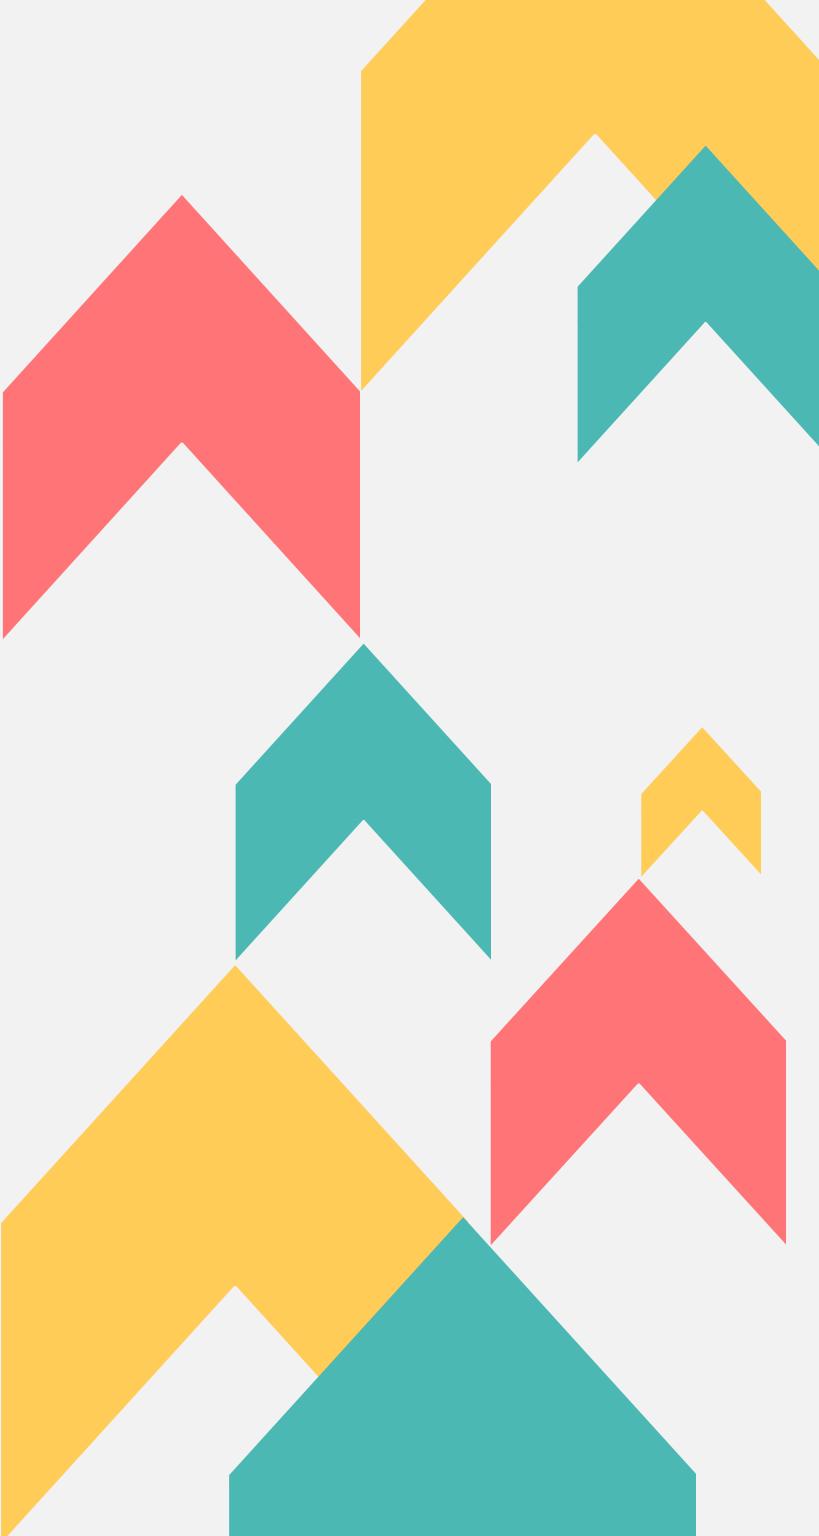

Learn and Repeat it yourself !

- 
- Enhance the user interface of the mobile app.
 - Add new modules to the app like guide to bath a baby or to feed a baby.
 - Make the application more interactive by an interactive chat bot.

Future Work

Thank you!
